## System CR9

**Mixed on site concrete/screed 4.2 Cube/hour output**

**The new way to produce a concrete/screed on site to maximise your labour productivity**

This system provides flexibility to the contractor, and a large mixing/pumping output capacity.

No need to wait for the pump/mixer to empty before remixing.

Load, mix and pump at the same time.  
(up to 84 Sqm per hour at 50mm thick)

The concrete/screed is designed to suit any characteristic specified by architects, structural engineers and building controllers.

Can be pumped up to 60m high (17floors)

This system can produce concrete up to C100/120
